

JAWS II Fluid Level Machine

Take Control of Your Fluid Level Testing

Simplify Your Fluid Level Testing. Maximize Savings.

The JAWS II is a powerful, portable, and easy-to-use tool that allows producers to perform their own acoustic fluid level tests on wells—**quickly, accurately, and on demand.**

Key Features & Benefits

- **Simple & Intuitive Operation** – Designed for easy use by all operators
- **Portable & Rugged** – Compact & tough design built for the field
- **Fast Setup** – Complete well tests in minutes
- **Data Storage & Transfer** – Save, review, and share results directly from the tablet
- **All-in-One Kit** – Includes acoustic gun, microphone, pressure transducer, cables, durable tablet, and field-tough carry case

Why Producers Opt to Buy

- **Cut Costs** – Eliminate expensive third-party testing fees
- **Gain Independence** – Schedule and perform shots when *you* want
- **Train with Ease** – Simple interface makes employee training quick and hassle-free
- **Accelerate Decisions** – Get real-time data to optimize production sooner
- **Boost Efficiency** – Free up your team and reduce downtime

JAWS II Fluid Level Machine

Take Control of Your Fluid Level Testing

The Producer Payback

The JAWS II Fluid Level Machine pays for itself ... and fast!

A common scenario - by the numbers:

Cost of One JAWS II Unit: \$15,000

Cost of Using an External Well Service Provider:

- \$100 per shot (includes travel, etc.)
- 2 shots per well = \$200
- 20 wells = \$4,000 per round of testing
- 2 test rounds = \$8,000 in just one week
- 150 total shots = **\$15,000 in service costs**

The JAWS II pays for itself after just 150 shots.

Think about that. For producers with 20+ wells, **that's a payback time of just 2 weeks of regular testing!**

The more wells you operate, the faster the ROI.

Take Control. Save Time. Own Your Data.
